Together we play

"Sometimes you can get so caught up in the whirlwind of modern life, that you forget what really matters: sharing quality time together. The joy of play is second to none and comes with endless benefits. We're passionate about building on this foundation, helping everyone who uses our products to live their best life, for years to come. This philosophy is reflected in our approach, which combines the fun and positive impact of playing games with the

very high standards we set for our products. There are so many benefits to playing games, but we think the way play can bring people together, whether for a one-off game or for a lifetime, is extraordinary. We're so passionate about it, we chose it for our company motto: **Together we play.** "

Michel Zany, CEO

18

Our product promises

Each and every Cornilleau product reflects our unwavering commitment to you. As a brand, we prioritize our customers' complete satisfaction.

Innovation

Easy to use = used more. We always put our customers first.

Durability

Consistent high quality, year after year. Robust designs that are easy to repair.

Design

Combining fun, functionality and style. Products that blend seamlessly into different settings

Quality

From beginners to experts, everyone deserves to enjoy the best possible gaming experience.

Responsability

We limit our environmental impact and promote positive values.

Durable by design

Cornilleau has been synonymous with Durability for many years, with our products undergoing rigorous testing in our laboratories and then under real-life conditions. This commitment is backed by substantial warranties: 3 years for indoor tables and a remarkable 10 years for outdoor tables.

Our brand has been committed to designing repairable products for decades, with customers being able to buy spare parts for at least 20 years after their original purchase, and sometimes even longer. The goal is simple: for people to enjoy playing their favourite games for as long as possible, and for our products to be passed down from one generation to the next.

A unique heritage

Cornilleau promises its customers an unparalleled game experience. The only way to keep this promise is to have complete control over the entire product chain: from the initial concept to full-scale production, including the design, prototyping and laboratory and field-testing phases. All these skills and expertise are located in-house at two sites in the Picardy region of France.

Cornilleau's heritage in joinery and cabinet-making has instilled a sense of pride in delivering exceptional products. Since its industrial transformation in the 1970s, the brand has cultivated a deeply rooted culture of quality. Listening carefully to its customers, Cornilleau is constantly improving its products to meet their needs, while at the same time maintaining the quality and durability that have made it so successful.

Cornilleau and CSR

The Cornilleau CSR policy centres on two key areas: reducing the impact of its products on the environment throughout their life cycle, and promoting education, inclusion, well-being and health through social initiatives.

14
—

encouraging
recycled
materials

80%
of suppliers located
within a 200km radius

-50%
of its industrial
waste over
the last 3 years

Responsible production

From design to manufacture, through distribution and end of life, there are many stages in a product's life cycle. Cornilleau strives to minimise its impact on the environment at every stage. This encompasses the durability of the product of course and how hard-wearing it is, but also how easy it is to repair. With 80% of suppliers located within a 200km radius, our focus on manufacturing our products within France is part of the same approach, while at the same time supporting the local economy. The brand uses recycled materials wherever possible, including both metal and plastic, while maintaining the same high level of product performance. The Softbat outdoor racket is made from almost 60% recycled materials. By encouraging the recovery and recycling of tables and parts that are no longer in use, Cornilleau has halved the weight of its industrial waste over the last three years.

Cornilleau and CSR

Social initiatives

Cornilleau works closely with partners including Ping Sans Frontières, the FFTT (French Table Tennis Foundation), the FFH (French Handisport Federation) and the Team's players to draw on the power of table tennis to promote education, inclusion, well-being and health.

16

Operation 1 school 1 table in partnership with the FFTT - 180 schools equipped in 2023.

Working sessions with Maxime Thomas, a top international player, to improve the ergonomics and accessibility of our tables for competitions, recreational use and community groups.

We actively support the FFTT programme to bring ping pong to community groups with the aim of allowing as many people as possible to experience the benefits of the game, from building social connections to the positive effects of getting active and playing sport.

Recycling and re-use of ping pong racket covers for the Des Plaques pour Tous project: 350 clubs have joined the campaign, with thousands of children around the world now enjoying playing with their own equipment.

Supporting Ping Sans Frontières teams in leisure leagues, including people with disabilities.

Supplying practice kits to clubs participating in the FFTT's Alzheimer's and Parkinson's ping pong programmes.

Innovation as a driving force

Cornilleau has always been committed to staying one step ahead rethinking how things are used. This ethos requires significant investment in design, research and development. With 10% of its workforce working exclusively in these three areas, the company is constantly pushing forward, ensuring it stays ahead of the game.

Our design philosophy

Every line, every piece of equipment, and every detail is designed from two perspectives: aesthetics and functionality. This approach allows us to create products that provide the best possible experience for each and every user. Our philosophy focuses not just on ergonomics, but also on performance and durability, so the pleasure of playing can be shared across the generations.

20
—

Cornilleau is working hard to reduce its impact on the environment, building responsibility into every design from the very start. Durable materials, environmentally-friendly design, and standard parts that make repairs even easier... every single design choice is part of our responsible approach.

Technical excellence

Expert craftsmanship with industrial quality. There is a very close relationship between research and development, where products are designed, and the manufacturing process, where they are actually made. It's the only way to produce large volumes of high-quality products that are constantly evolving and being improved. This philosophy has been passed down from Pierre Cornilleau, who implemented it back in the 70s, producing up to 100,000 world-class ping-pong tables every year.

22
—

24
—

Serious about quality

We test each and every component of all our products in our in-house laboratory to assess its mechanical integrity, strength and durability. This is followed by rigorous testing under real-life conditions. Even when a product is on the market, we don't stop there - we are constantly looking for ways to make it even better.

Happy to help

We have a specialist team based in our head office dedicated to providing outstanding support to all our customers, retailers, and partners alike. Tasked with assisting, advising and offering effective solutions, this team is supported by experts at the same location to provide the best possible response to your queries. Spare parts are available for at least 20 years after you purchase a product from us. You can reach out to our customer service team or visit our dedicated after-sales website: cornilleau-services.com

Our customer service team can respond to enquiries in French, English or German and is available from Monday to Friday, 8am to 12pm and 1.30pm to 5.30pm. We also respond to inquiries submitted via the form on our website.

Passionate about ping-pong

Cornilleau and the evolution of outdoor ping-pong

30
|

1988

The first outdoor
ping-pong table:
the "Tropicale"

Cornilleau
UN REBOUND D'AVANCE

Recreational ping-pong experienced a major revolution in the 1980s. Pierre Cornilleau, who was running the company at the time, wanted to transform ping-pong, traditionally an indoor game, to be enjoyed outdoors. Meanwhile, society's focus on leisure activities was growing, as was the number of people living in their own homes. Against this backdrop, and pioneering the use of new, more resistant materials, Cornilleau brought out the first ping-pong table specifically designed for outdoor use in 1988. The move to solid resin laminate playing surfaces and a composite aluminium structure made the brand's ambition a reality. Today, more people than ever before enjoy playing ping-pong, but the demands of the outdoor environment and the expansion of ping-pong to

include all kinds of players mean that the game has to evolve. Cornilleau is constantly working to make its tables stand out from the crowd: making them stronger, safer and easier to move and store, while still delivering game quality designed to satisfy even the most demanding players. Outdoor tables are even more hard-wearing, to withstand both the weather and the test of time. They can be used with complete confidence, without worrying about any damage being caused by rackets or anything else. With a 10-year warranty, they often last far longer and are passed down from one generation to the next. The availability of spare parts for at least 20 years after the original purchase is further reassurance that you will be enjoying your table for many years to come.

Take your table for a spin

32
—

Any terrain

All our outdoor tables are equipped with heavy-duty oversized articulated twin wheels, for effortless maneuverability across uneven terrain. They are so easy to move, portable and versatile, all you need to do is choose your playground.

Space-saving design

Cornilleau tables use the patented Compact Technology system to take up as little space as possible when folded away, while still being easy to move around and extremely safe.

Safe and sound

Cornilleau folding ping-pong tables have either 8 or 16 locking points, depending on the model. The tables with 8 locking points are fitted with the Push'n Lock system, which complies with current safety standards. The models with 16 locking points incorporate DSI (Double Integrated Security) technology, offering unbeatable safety and a user-friendly design, with a single central release handle for folding and unfolding the table.

Accessories and finishes: customize your table

34
—

Matt finish tops for reduced glare

Cornilleau table surfaces are designed to deliver the best possible playing experience. The Softmat and Mattop finishes both dampen glare from the sun to stop players being dazzled. These finishes reduce glare by 3 and 10 times respectively. Tables in the Sport range feature the Softmat finish, while tables in the Performance range and community tables have the Mattop finish.

37
—

More than just ping-pong

Whatever way you play it - as a sport, a hobby or just a bit of fun - ping-pong is all about getting together, having a good time and enjoying yourself. Come rain or shine, on your own, in pairs or bigger groups: do it your own way and enjoy it to the full. Ping-pong offers an unparalleled sense of freedom and inclusivity - anyone can play. The tables in the Sport range reflect this attitude, which lies at the heart of the game. Their exceptional quality, durability and weather resistance, combined with the safety features and playing experience they offer, mean that everybody can join in the fun of ping-pong and not worry about a thing.

Play knows no limits

Playing gives us a fantastic sense of freedom, it's an opportunity to break away from our usual routines, to relax and see other people in a different light. If you're looking for a challenge and plenty of fun with a competitive edge, you need a ping-pong table you can rely on. The design, high quality materials, attention to detail and exceptional features of the tables in the Performance range exceed all expectations, offering a unique gaming experience with no barriers or limits.

The perfect playing surface for indoor players

The bounce, the spin and even the sound it makes when the ball hits it: the chipboard used to make Cornilleau indoor tables is second to none and particularly popular with purists. Widely recognised as being excellent value for money, it's a firm favourite with many players. The Cornilleau indoor leisure range has been updated for 2022 to give these timeless tables a new lease of life.

Leisure Indoor tables

Love your table!

Your indoor table will thank you for some TLC. You should never use it outdoors, prevent any spills on the playing surface, and always keep it dry, out of direct sunlight and away from excessive heat. You should also avoid hitting it with rackets or any other objects, to prevent damage that could compromise your playing experience as well as the appearance of your table.

Open access ping-pong

A public park, an outdoor venue, a school playground, a leisure centre... ping-pong can be enjoyed in places that are open to just about anyone. Tables used in these types of locations must be able to cope with intensive use by the community and be able to withstand abuse. This is one of the key requirements behind the design of Cornilleau's community tables. There was no question of compromising on the quality of play to accommodate these standards because no matter where it's played, the game comes first.

Top performance for top players

Building on its experience working with top-level players in competitive ping-pong, the FFTT (French Table Tennis Federation) and the FFH (French Handisport Federation), Cornilleau has steadily developed the technologies necessary to offer club players at every level the very best, right up to international championship events. All Cornilleau competition tables are ITTF certified.

The spirit of competition

Cornilleau has been working with top-level ping-pong players for many years. Today, the brand is partner to around ten elite players, each of whom has a strong, longstanding relationship with the brand. And in 2023, Maxime Thomas joined this select group. A partnership was the natural next step when we met, based on his passion for ping-pong and his personal values. He's now involved in a range of projects within the company.

Supporting the federations

Cornilleau is a long-standing partner of the French Table Tennis Federation and the French Handisport Federation.

Federation events have been played on Cornilleau tables for over 30 years, but the company's commitment to the FFTT doesn't stop there. The partnership has led to a range of social initiatives in schools and community groups to promote table ping-pong for all ages, and healthcare initiatives to help combat certain neurodegenerative conditions.

Faithful to our promise to make table tennis accessible to as many people as possible, Cornilleau also supports the ping-pong division of the French Handisport Federation. Our involvement includes helping clubs with a parasport section, as well as support for federation training centres and the French national team.

71

Competition
indoor tables

Equipment and game quality

72
—

Extremely durable materials

Competition tables are designed for intensive use and handling. Whether your club has a dedicated ping-pong hall or instead caters to a wider range of activities, you need reliable tables made from hard-wearing materials.

Fixed posts

The net posts are fixed firmly to the table, making it much quicker and easier to use. What's more, you can adjust the height of the net without changing the tension, so you can get it ready to play in next to no time.

73

A unique finish

The Skiltop finish on the table tops is unique to Cornilleau competition tables. This finish delivers a consistent, smooth bounce and superb surface friction for flawless spins.

Competition
indoor tables

Equipment and game quality

74
—

Top safety features

Cornilleau competition tables feature the DSI (Double Integrated Security) system, which offers the highest level of safety on the market with 16 locking points. The locking handle allows the table to be folded and unfolded independently in complete safety.

Space saving footprint

Cornilleau competition tables use compact technology to reduce the amount of space they take up when folded. The first table measures 65cm across when folded, with each additional table slotting neatly against the last, each adding a further 45cm.

75
—

Disabled access

Cornilleau folding competition tables are wheelchair-accessible and comply with the ITTF W standard. The new 850 W goes even further, featuring redesigned ergonomics to adapt to different height wheelchairs.

USER COMFORT AND WHEELCHAIR ACCESSIBILITY

- Inclined frame on player's side
- Adjusted frame height and foot recess comply with the latest wheelchair access recommendations.

REDUCED STORAGE SPACE

- Compact Technology: maximum safety and minimum space requirements.
- When folded, compact tables can be interlocked to reduce the space taken up:
1 table = 65 cm.
Each additional table = 45 cm.

Limitless play

Play anywhere you want in complete confidence. Never worry about where you left your rackets after a game, no matter what the weather throws at you. Keep the same rackets, year after year, and hand them down. Outdoor rackets offer this peace of mind, and so much more. They are particularly hard-wearing and designed for the great outdoors, whether it's windy, snowing, raining or blazing hot. Softbat, Tacteo, Nexeo: there's something for every player at every level.

Softbat

Durable and sustainable

The SOFTBAT is made by recycling and recovering cotton and polyester textiles from discontinued ARMOR LUX collections and used clothing collected from its customers. SOFTBAT is the world's first outdoor racket designed to be eco-friendly, but there's more to it than that. It is ultra-durable and suitable for intensive use, both at home and in schools. Its ergonomics are perfect for beginners, helping them to position their hands and fingers correctly.

Available in a **DUO PACK**
- set of 2 rackets.

QUATTRO PACK - set of
4 rackets and 4 balls.

And as a **SOFTBAT
SCHOOL** pack - set of
10 rackets for groups. More
details on page 118.

Tacteo

Warranty

MADE IN
FRANCE

Control and playability

Tacteo rackets combine grip and control with an elastomer coating and patented surface structure. These versatile rackets are suitable for players of all abilities. Impact resistant and weatherproof, they're a durable choice for playing with friends and family, while their vibrant design adds a fresh pop of colour to your game.

Available in a **DUO PACK**
including 2 rackets and 3 balls.
More details on page 118.

TACTEO SCHOOL
pack of 10 rackets for groups.

Nexeo

Turbocharge your game

The Nexeo racket is all about performance and durability. Its speed, precision and rotation are unrivalled by any other outdoor racket and reflect the painstaking work carried out by Cornilleau engineers and our rigorous testing process. The exclusive surface and ergonomic design make it the perfect partner for serious players. Strength and durability combine for unlimited playing pleasure. It is available in three versions: The original X70, the X90 which boasts carbon in the blade for faster play and the graphite X200, which is ultra lightweight and delivers an explosive performance.

X70

Next-generation composite racket

X90

Next-generation carbon composite racket

X200

Next-generation graphite composite racket, lightweight and explosive

Performance is the name of the game

Sport, Perform et Excell: Cornilleau has devised three ranges of high-performance rackets for indoor play. From casual gameplay to high-intensity matches, all these rackets feature ITTF-approved surfaces. Because all players deserve the same level of enjoyment and confidence in their racket, whatever their ability.

Bringing technology into play

98

ITTF CERTIFIED RUBBERS

All our indoor racket rubbers have undergone the necessary tests and inspections to ensure quality, safety and compliance with ITTF (International Table Tennis Federation) standards.

AERO - AERO SOFT

Aero and Aero Soft technologies allow the vibrations generated by the impact of the ball to be transmitted to the handle as efficiently as possible. Sensory receptors in the hand respond immediately with all the information needed for a perfect shot!

DYNACELL

The key to a foam's elastic response in terms of achieving peak energy restitution lies in optimizing the material's composition/structure balance. That key now has a name: Dynacell.

OPTI FEEL CONCEPT

The wood fibres in each layer are arranged at right angles to each other, for extra stability. The Opti feel concept maximizes feedback and delivers immediate gains in control and accuracy.

EFFICIENT CURVE

Made of 90% natural rubber, the compact Efficient Curve provides unrivalled grip on the fastest rubbers.

CARBON TECHNOLOGY

The 100% carbon insert where the handle meets the blade adds extra rigidity for more powerful play.
